08.2015 – Continues

Psychologist in the Secondary Municipal School “Dimitar Mirasciev”, Shtip, Macedonia

- Psychological counselling of the students and their parents (from Macedonian, Turkish and Roma nationality),
- Counseling especially of Roma youth (pupils) regarding: their irregular presence in the lessons at school, abandonment of the school on their own will, although the secondary education is obligatory by law and explanation how important is the education for their future quality of live, Counseling of the Roma youth girls in order to reduce the number of juvenile marriages and living in an informal community, which are one of

the most important reasons for dropping out of school which leads to limitation of the opportunities for their integration into the society, Counseling of the Roma youth in order to teach them to positive behavioral patterns with their classmates in the school,

- Counseling of the parents of the youth from Roma population in the aspect that their involvement in the education of their child is essential for the children to finish their high school, thus to improve their involvement in the school. The goal of this counseling is to increase the awareness of the parents about the importance of the education and the possible consequences of early school leaving,
- Pedagogical documentation,
- Assistance and contribution in the educational process.
